

桜島レンタサイクル Sakurajima Bike Rental

Cycling Map

Yunohira Observatory Course

Passing through the Sakurajima Lava Road, which is colored with the green of Japanese black pine, you will see Sakurajima coming closer and closer. When you reach the observatory, a spectacular view awaits you.

We recommend that you use an e-bike.

Distance : Approx.10km

Time required : 2 hours

E-bike rental only

Rainbow Sakurajima

Around-Sakurajima Course

The clockwise route along the ocean side is recommended. The course includes the calm Kinko Bay, Sakurajima, which changes its expression depending on where you look, and there are many sightseeing spots.

Why don't you enjoy it with a cross bike, an e-bike, or a rental bike of your choice?

Distance : 36km

Time required : 3 to 4 hours

Heading to Yunohira Observatory

Arimura Lava Observatory

At the end of the slope that you keep climbing
— a spectacular view!

Yunohira Observatory Course

Distance : Approx.10km

Time required : 2 hours

This course takes you to the Yunohira Observatory (373m above sea level, 4th station of Mt. Kitadake), the highest point on Sakurajima Island that is open to the general public. For the long slopes, use the gears on the cross bike and the electric assistance on the e-bike for a comfortable climb.

Cycling Precautions

- Please drive in accordance with Japanese road traffic laws.
- Please be sure to wear a helmet for your safety.
- Please be careful when riding, as there are areas with heavy traffic. The volcanic ash on the road is slippery, so please be careful.
- Please wear snug clothing, or clothing loose enough to adjust so as not to get caught in the wheels or chains. Do not wear sandals that are easy to take off, as they may cause accidents.
- When you park your bicycle for sightseeing, be sure to lock it and take your helmet and luggage with you.
- Even if the volcano is not erupting, the accumulated ash can get into your eyes. If you are a contact lens wearer, please use your glasses.

What should I do if my bike breaks down or stops working?

Please restart the e-bike according to the instructions that come with it. If it still does not work, please call the place from which you loaned the bike.

Let's take a break while riding.

Around-Sakurajima Course

Distance : 36km

Time required : 3 to 4 hours

You must ride bicycles on the left side of the road. Then ride clockwise and enjoy the view of the ocean. You can enjoy the real thrill and sense of accomplishment of riding around Sakurajima. You can experience the history of Sakurajima, which has had 17 large-scale eruptions since its birth some 26,000 years ago.
